

## CRYSTALBALL CHRONOGRAPH

*Badollet takes its personalisation concept to extremes with the Crystalball Chronograph: associated with an exceptional mechanism, its classic design can be interpreted in numerous different ways according to personal preferences...*

### AN EXCLUSIVE AND PERSONALISED DESIGN

Three kinds of dials, each offered in a choice of materials, a range of dial-ring variations: the Crystalball Chronograph is capable of adapting to all kinds of aesthetic and technical desires.

#### ENAMELLED, SPORT OR STONE DIALS

The Crystalball Chronograph is available with three types of dial:

- The *grand feu* **Enamel** dial is adorned with Arabic numerals, leaf-style blued steel hour and minute hands and straight chronograph minute and seconds hands
- The opaline silver-coloured **Sport** dial is adorned with Arabic numerals, rhodium-plated leaf-shaped hour and minutes hands, and rhodium-plated straight chronograph minute and seconds hands
- The **Stone** dial, featuring an hour circle with Roman numerals in 150 palladium-coated white gold, will be available in a choice of onyx, white mother-of-pearl, black mother-of-pearl, jade and lapis lazuli, etc. Rhodium-plated leaf-style hour and minutes hands and rhodium-plated straight chronograph minute and seconds hands.

#### DIAL-RING VARIATIONS

The broad variety of dial rings imparts different technical features and qualities to this Instrument of Time. When fitted with a **sapphire** dial-ring, the Crystalball highlights the movement and adds a transparent touch to the case. Lightness is the keynote in the **titanium** version.

**Zirconium ceramics**, an extra-hard material not sensitive to heat, imparts its strength to the case, while the **ebony** dial-ring celebrates the encounter between nature and the technology of an exceptional movement.

Issued in editions that are by nature limited and personalised, the Crystalball Chronograph is available in multiple combinations and available on a genuine crocodile leather strap complete with 150-palladium-coated white gold folding clasp.

### **THE MONOPUSHER CHRONOGRAPH, AN EXCEPTIONAL MECHANISM**

Undoubtedly one of the hardest complications to fully master, the monopusher chronograph is one of the most subtle expressions of horological expertise. When combined with a tourbillon regulator, it becomes a truly exceptional work of art.

Its sophisticated, streamlined case in 150 palladium-coated white gold, measuring 44 mm in diameter, houses the imposing BAD1602 hand-wound calibre. This monopusher column-wheel chronograph movement with tourbillon regulator is endowed with a 120-hour power reserve and drives the hour and minute indications, the 60-second and 30-minute chronograph counters at 1.30 and 10.30 o'clock respectively, the power-reserve display on the back of the movement, as well as a flying tourbillon appearing through the dial opening at 6 o'clock. Visible through both the transparent case-back and the dial opening, the meticulous finishes – bevelling, circular graining and Côtes de Genève motifs – skilfully reveal the inherent added value of this Haute Horlogerie creation.

**BADOLLET UNITES HAUTE HORLOGERIE PRIORITIES BY ALLYING AN EXCEPTIONAL MECHANISM WITH AN EXCLUSIVE AND PERSONALISED DESIGN.**

**THE CRYSTALBALL CHRONOGRAPH BY BADOLLET TRULY DESERVES TO BE CALLED AN INSTRUMENT OF TIME.**

## “CRYSTALBALL CHRONOGRAPH” TECHNICAL CHARACTERISTICS

### ***MOVEMENT***

***BAD1602***

- Manual winding
- Monopusher chronograph with clutch on the tourbillon carriage, and with minute and seconds counting
- Tourbillon visible at 6 o'clock on the dial side
- 120-hour power reserve with indicator visible through the case-back

### ***CASE***

- 3 parts
- Back and bezel in 150 palladium-coated white gold
- Various types of dial ring: sapphire, white gold, titanium, zirconium ceramics, ebony
- Colourless glareproofed sapphire crystal on both sides, treated to ensure extreme hardness
- 150 palladium-coated white gold crown pusher
- External diameter : 44 mm
- Inter-horn width : 24 mm
- Water-resistant to 30 metres

### ***DIALS***

- Cambered *grand feu* enamel, gold base  
Black Arabic numerals
- Opaline silver-coloured, white gold base  
White gold applied Arabic numerals
- Lapis lazuli, black mother-of-pearl, white mother-of-pearl, onyx, etc.  
Gold base. Hour circle with gold Roman numerals
